Dugald MacIain Og m. dtr. of Murdoch Mackenzie, 3rd of Achilty, possibly lived Achan sheen, Contin, Ross-shire

Murdoch Mor in Lewis 1658, tacksman of Arinish, m. gdtr .of Chief Donald Cam MacAulay

John Ban, tacksman of Arinish, Lewis, served as heir in 1705 m. Janet Morrison dtr. Rev. Kenneth Morrison of Stornoway

Malcolm (Calum Ban), d. aft 1780 of Crowlista, Uig, Lewis

Donald Ban c. 1740-1831

Donald 1794-1869, Hudson’s Bay Co. m. Ella MacIver

Donald Ban, d. 1751

Stornoway, Lewis

Murdoch, d. Kirkton, Lochalsh, Ross-shire

John Ban

1758-1826

Slumbay, Lochcarron, Ross-shire

Haplogroup I2b1 - Isles descendants

M. M. III and J. C. Matheson

Haplogroup R1b1a2

Donald Ban, d. 1751

Stornoway, Lewis

Murdoch, d. Kirkton, Lochalsh, Ross-shire

John Ban

1758-1826

Slumbay, Lochcarron, Ross-shire

Donald of Uig, Lewis

Hector

b.c. 1750- aft 1824

Haplogroup I2b1 - Isles descendants

M. M. III and J. C. Matheson

Haplogroup R1b1b2

John (Iain Ruadh)

of Uig, Lewis

Hector

b.c. 1750- aft 1824

John of Aird, Uig, Lewis, 1804-1878

Hector lv. Valtos, Lewis, 1832-?

John Hector

1875-1952

J. D. and R. C. both have the same nutation at 464d so they are likely off the same branch. J. D.’s ancestor Iain Ruadh was thought to have been the son of a MacAulay tachsman of Brenish by a Matheson mother, but DNA shows that he is definitely a son of a Matheson male, so I connected him by dots to Murdoch Mor whose wife was a MacAulay. He might have been a grandson of this couple.

This page includes three different Haplogroups which separated thousands of years ago, so all three lines cannot be related.

Haplogroup R1a - The men who can trace their ancestry back to Murchadh Buidhe through the book The History of the Mathesons all are in Haplogroup R1a, Viking. The Dougald Mac Iain Og line likely traces back to a different John Og, than Murchadh Buidhe’s second son..

Haplogroup I2b1 - There was always some question about the line from John Ban of Slumbay and the DNA shows that they can’t be related to these other Lewis lines nor to Murchadh Buidhe. Note that John Ban and his father Murdoch are living on the mainland, not on the Isle of Lewis.

Haplogroup R1b1b2 - The men who are found across the bottom all are in a matching family and trace to the Isle of Lewis. Most trace back to Donald who m. Ella McIver. Their palindromic (paired) mutations are are either one up or one down from the modal so Donald (1793-1869) should be the modal. J. D. and R. C. both have the same mutation at 464d so they are likely off the same branch. J. D.’s ancestor Iain Ruadh was thought to have been the son of a MacAulay tachsman of Brenish by a Matheson mother, but DNA shows that he is definitely a son of a Matheson male, so I connected him by dots to Murdoch Mor whose wife was a MacAulay. He might have been a grandson of this couple.
